PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: Kuei-Jung Lee. Filing Date: 09/30/2003

5 Appl. No.: 10/605,455 Docket No.: WNCP0003USA

Examiner: KING, JUSTIN Confirmation No.: 2454

Title: PERIPHERAL DEVICE HAVING A PERSONAL DISK USED FOR
STORING DEVICE DRIVERS

10

To: Commissioner for Patents
P.O. BOX 1450
Alexandria, VA 22313-1450

15 Subject: Information disclosure statement under 37
CFR §1.56

Dear Sir/Madam,

20

This is an Information Disclosure Statement in accordance with the duty to disclose information material to patentability under 37 CFR §1.56. The applicants wish to make of record the documents listed 25 on the accompanying form PTO/SB/08.

Since this IDS is filed before the mailing date of the first Office action, consideration of the information disclosure statement is hereby requested according to 37 CFR 30 §1.97(b).

That each item of information contained in the information disclosure statement was first cited in an Office

communication mailed on October 18, 2005 for the counterpart Taiwan patent application number 093110686, which are no more than three months prior to the filing of the information disclosure statement.

5

According to the requirement set forth in 37 CFR §1.98, a copy of each cited reference and its English language abstract is included to fulfill the concise explanation requirement.

10

The first cited document (TW 518466) provides a peripheral device with embedded driver program and the installing method thereof, wherein the computer system can get the driver program from the peripheral device with no need for CD or diskette 15 for installation. The present invention is to store the driver program of the peripheral device in the read only memory. When installing the peripheral device, the driver program can be transmitted to the computer system from the peripheral device with no need for CD or diskette to drive the peripheral device.

20

The second cited document (TW 555298) provides a small type memory device with built-in driver. The memory device includes a memory and a blue tooth transceiver module or wireless (IEEE802.11b, etc) transceiver module. In addition to 25 providing normal memory functions, the memory also includes a blue tooth driver program utilized for controlling the blue tooth transceiver to perform short range wireless transmission to immediately transmit information stored in the memory, or to receive information for subsequent storage 30 in the memory. Additionally, the memory can also include other common driver programs to allow a computer system to automatically detect and install the driver program. In this

way, the user does not need to also carry an optical or magnetic disc. The invention provides a portable memory having short range transmission abilities for flexible plug and play to thereby increase portable convenience and effectiveness.

5

It is respectfully requested that the examiner can consider the documents listed on the accompanying form PTO/SB/08 and that it be made of record in the application. The applicants sincerely hope that the examiner initials the 10 cited references on the form and that a copy of the initialed form be sent to the applicants with the next communication from the examiner.

15

Respectfully submitted,

20

Date: November 28, 2005

Winston Hsu, Patent Agent No. 41,526
